

Pewter Patina Finish * - (For Internal or External Use)

This finish is elegant and beautifully highlights the texture of the steel. The unique and complex process runs deep into the metal resulting in an unmatched contrast of texture and colour. It has excellent anti-corrosion properties but we recommend that this finish is wiped with a lightly oiled cloth from time-to-time which will remove harmful deposits and maintain it in its original condition.

* All references to 'Pewter' throughout this website refers to products being finished with a 'Pewter Patina Finish' or 'Antique Pewter Finish'.

Warning: The chemicals in wet plaster will rust our products. Only fit your new ironmongery when you have made sure that all new plaster is fully cured.
