

Beeswax Finish - (For Internal Use Only)

The beeswax finish is the most authentic finish for steel. When our highly skilled blacksmiths have finished forging each product the colours left in the steel range from blue to deep red ochre.

To preserve these beautiful colours and the texture from the hammer and anvil, we apply pure beeswax. This gives a subtle, matt richness to the metal and offers excellent protection when products are fitted internally and properly maintained.

Warning: The chemicals in wet plaster will rust our products. Only fit your new ironmongery when you have made sure that all new plaster is fully cured.
