

Black Finish - (For Internal or External Use)

Our satin Black Finish is baked in a high-temperature oven giving it an attractive, durable and corrosion-resistant finish which is low maintenance and can be used internally or externally. It is resistant to moisture so can be used in bathrooms and damp conditions.

We recommend that this finish is wiped with a lightly oiled cloth from time-to-time which will remove harmful deposits and maintain it in its original condition.

Warning: The chemicals in wet plaster will rust our products. Only fit your new ironmongery when you have made sure that all new plaster is fully cured.
