

# PROSTYLE LETTERBOX

**Weather Sealing**  
through a combination of external foam and internal nylon brushes

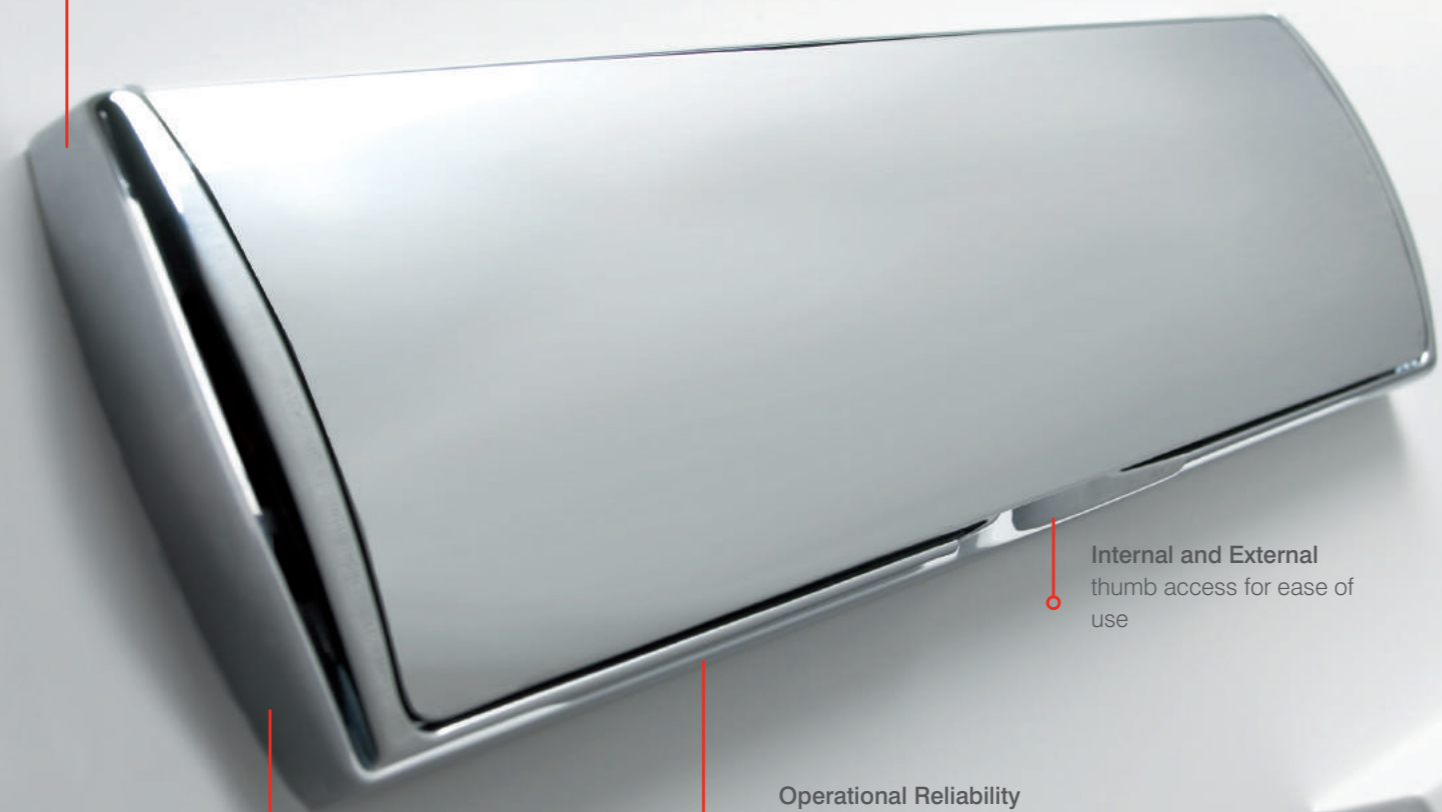

**TechTape**  
protected with easy-peel static-cling film

**Telescopic Sleeves**  
20/40mm & 40/80mm to suit most door thicknesses

**Smart Design**  
Concealed flap-operating mechanism with 180 degree opening

**Internal and External thumb access** for ease of use

**Operational Reliability**  
Tested to British Standards achieving 50,000 cycles under-load

**Corrosion Resistant**  
finishes to 480hrs and 240hrs

The ProStyle letterbox designed in house by Mila's specialist product development team, combines smart design features, reliable operation and contemporary finishes.

Design registered, with patent pending, the sleek frame and flap design incorporate a concealed flap operating mechanism to maintain subtle exterior sightlines.

The ProStyle letterbox features internal and external thumb access for ease of use. When fully open both internal and external flaps open to 180° without over stressing and smart frame design prevents abrasive action against the flap during operation.

Tested to meet industry standards at the UKAS accredited Mila Test Centre the ProStyle letterbox has been cycle tested to 50,000 cycles

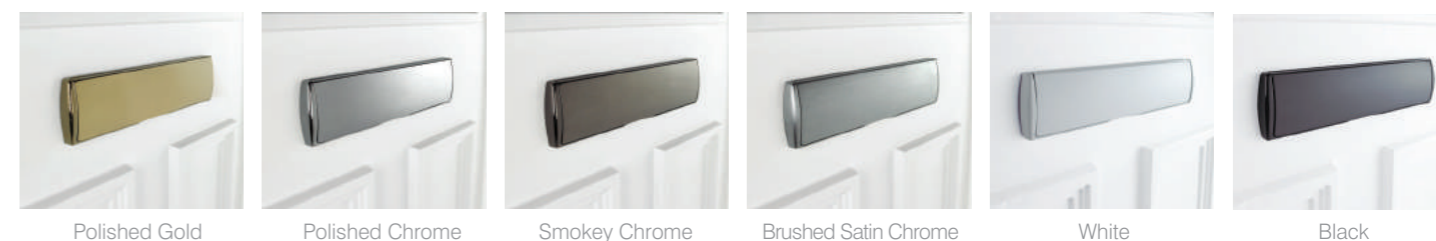

and has superior corrosion resistance, exceeding the 240 hour industry requirement.

A combination of external foam and internal nylon brushes maximises weather sealing.

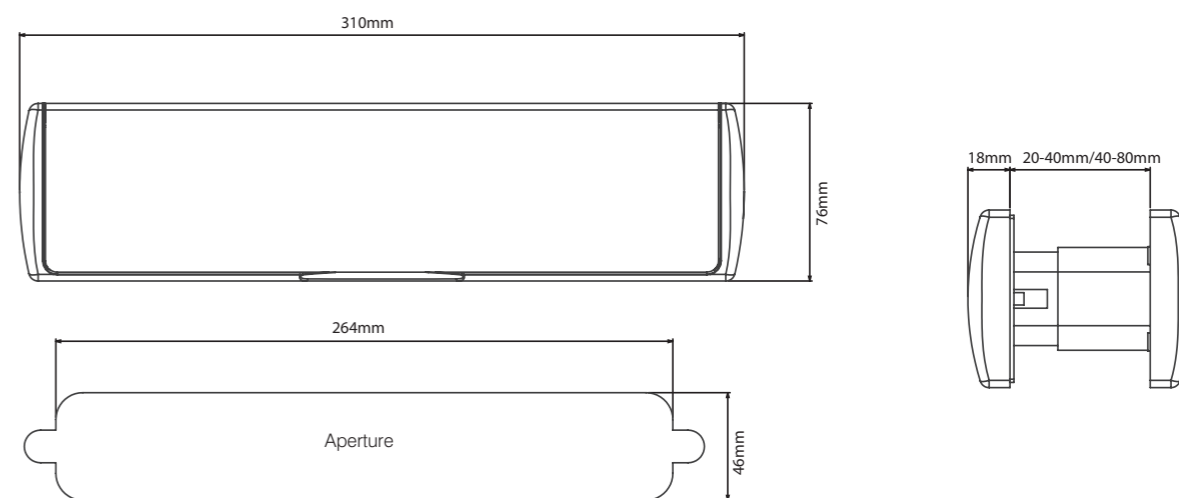

The ProStyle letterbox is available in two telescopic sleeve sets to suit door thickness 20-40mm and 40-80mm.

**10** Mechanical Guarantee years  
**10** Surface Finish (powder coated) Guarantee years  
**5** Surface Finish (polished) Guarantee years
